Fraud Prevention

Your smart chip card comes with an encrypted microchip embedded in the card. The microchip provides an enhanced layer of security to your transactions, making your new chip card extremely difficult to counterfeit. You can still use this card at non-chip terminals.

To further protect yourself, follow these safety tips:

- Continue to monitor your account regularly and immediately report any suspicious transactions or if your debit card is lost or stolen.
- Sign your new card immediately and destroy your old card.
- Reduce your risk of mail fraud by signing up for paperless statements.

If your card is lost or stolen please contact the bank immediately: 833.933.1681
